Mr. Norman Niedergang
Environmental Engineer
U. S. Environmental Protection Agency
230 South Dearborn Street
Chicago, IL 60604

Dear Mr. Niedergang:

Per Mr. David C. Bach's letter to Mr. Thomas W. Daggett you will find enclosed the following documents for the Edwin Cooper, Sauget, Illinois plant.

1. Health and Safety Plan for the Completion of the Unit 268 Construction Site
2. Proposed Soil Sampling Program
3. Description of Remaining Construction Work in the Unit 268 Construction Site
4. Envirodyne's Quality Assurance Program and Sampling Protocols.

One comment on the proposed soil sampling program should be pointed out. In our discussions concerning sample location we had initially indicated a total of 18 soil samples plus two sewer samples. Upon reviewing the drawing we marked up at the Sauget meeting, we can only find 17 soil samples plus two sewer samples. I do believe that these 19 samples present the correct number of samples.

If you have any questions concerning this document please feel free to contact me.

Sincerely yours,

Sam McWilliams
Plant Manager
